Landing, Registration and Login

Landing Page

An attractive, modern and responsive landing page for a Digital Marketing website is to be created.

A Super admin is to be created.

Registration

Frontend and Backend for registration of the following modules is to be done

1. Business Analyst

2. DM Analyst

Approval for both is done by admin.

Approval for the above should be done in the admin side.

After approval by the admin only should the Business Analyst and DM analyst should get their respective credentials.

Login

Frontend and backend for all modules is to be done, including Admin.

Once logged in it should redirect to the respective user.

Live validations should be there in registration.

Everything should be responsive.

There would be total of 3 Modules

1. Admin

2. Business Analyst

3. DM Analyst
